

Product Name: Rubber Parking Curb

Also Called: parking stops, home parking curb

Description: Our Parking Curbs are made from recycled tire rubber. They are 100% recycled material making them an environmentally friendly option. These products are the perfect option for marking parking spaces as well as for protecting walls, vehicles and other valuables. They are commonly used at parking lots, restaurants, homes, industrial buildings, hotels, hospitals, schools, shopping centers and parking facilities. The parking curbs are also embedded with highly reflective yellow tape making them easily visible at night. Using rubber curbs versus concrete is advantageous as they reduce chances for damage to cars and pedestrians.

These curbs are ideal for use outdoors as they are resistant to rotting, warping, chipping and cracking. The parking curbs are UV resistant and also resist damage caused by oil, moisture and extreme changes in temperature. They are removable, reusable and storable marking them not only long lasting but also cost efficient.

Options Available: The parking curbs are available in the standard size 72" L x 6" H x 4" W as well as the Home Park-It curb size 22" L x 6" H x 4" W for residential use. These products are also light weight making allowing for easy installation. The standard size weighs 34lbs and the Home Park-It curb weighs 9lbs.

Installation Recommendations: : This light-weight product is easy to install as they can be lifted by one person. The standard size comes with lag-bolts for concrete application or rebar spikes for asphalt application. The Home Park-It curb can simply be placed in your driveway or garage without any installation.

Additional Info: There is no minimum order for this item. Place your order today and your curb will ship tomorrow.
